SEASON 1940

# Terms—Rules

**F**irst: No Plant order is filled for less than \$1.00, unless you pay 25 cents extra for packing and postage. No seed order is filled for less than 25 cents.

**S**econd: We pay the postage on all mail orders, but plants on which we pay the postage are of necessity smaller than those upon which you are willing to pay the postage or have sent by express. You understand that we cannot pay out the biggest part of our profit for postage. Therefore, if you are willing to pay the express charges, or will pay 10% on your order towards the postage, we gladly send you larger plants, **except in cases of rare and expensive plants**, of which you can expect only small divisions at the best.

**Third:** We do not open accounts—we are too busy, and bookkeeping is too expensive. Neither do we send plants or seeds C. O. D. unless one-half is paid with the order.

**Send Money Order, Express Order, Check or Draft.**

If you send currency, have your letter registered; we assume no responsibility if money is sent in an ordinary letter.

If you must send stamps, please do not send more than 50c worth.

**Fourth:** All stock is offered subject to being unsold on receipt of order; if stock ordered is not available, unless you have named some substitutes, we will return your money—we do not substitute.

**Fifth:** We guarantee our plants and seeds to be true to name; if through some error on our part the plant turns out otherwise, we will replace it free of charge; this, however, does not apply to seedlings that have not bloomed yet and of which certain colors are ordered; we can give no warranty, express or implied, that the progeny will be true to the parent color; this applies particularly to Delphiniums, Columbines, Lupins and Oriental Poppies.

**Sixth:** The choice flower seeds offered herein are absolutely good and fresh and with reasonable care and skill on your part a large germination should be obtained in every case, with some exceptions, however, of a few notable bad germinators. Some seeds lie in the ground for a long time, some all Winter, and then come up strong in the Spring. With good care, all flower seeds are as good in the Spring as they were in the fall. Some people have the notion that Delphinium seeds lose all their strength by Spring. This is absolutely not the case; these seeds, if sown with ordinary care, are just as good for Spring sowing as they were in the Fall, the only difference being that instead of germinating in 10 days it might take them 3 or 4 weeks. We sow many ounces as late as April 15th; 30 days later we have a beautiful stand of tens of thousands of seedlings, the long rows looking like a wide green ribbon.

**Seventh:** We are not responsible for delays in the mails, and particularly not if the stock is held up through Quarantine regulations. If you are so unfortunate as to live in a State that has stringent plant laws and where plants are sent, after being received at your Post Office, to a central inspection point, often many miles away, then opened up, handled, perhaps fumigated, and after such treatment carelessly re-packed and returned to your Post Office, often causing days of delays. We would advise shipments by express.

We want to thank all customers for their patronage in the past. On the basis of service and satisfaction we solicit your orders, large or small.

## Introduction

In compiling our 1940 Seed List, our aim has been to offer seeds and plants worth sowing and growing. Plants and seeds with high sounding names, unproven NOVELTIES, many of which have only little merit, we have rigidly excluded.

We do not believe in listing seeds or plants just because it is a novelty or rare, hoping to sell it by omitting to say that it is also deplorably unattractive and dull. We have made all descriptions as just and accurately as possible.

When we say that a flower is beautiful, we mean that we really do think it beautiful; and when we say that the color is blue or pink, we mean that it really is blue or pink.

**UNWIN'S ENGLISH MIGNON OR CHARM DAHLIAS.** In this new race are combined the best qualities of Coltness Gem and the Charm type. In the main, the form of flower is semi-double but a few single and fully doubles are produced. The hybrids are very precocious, blooming 3 to 3½ months from the time of sowing. They are extraordinarily free, the blooms being thrown up on strong stems well above the foliage. Rarely exceeding 24 inches in height, they do not require stakes, and may be planted as closely as 18 to 20 inches apart. Given the same treatment, they are easier to raise from seeds than Asters or Stocks. We believe the color range to be wider than in any other type of Dahlia.

**SEEDS:** ¼ oz. \$1.50; ⅛ oz. (over 500 seeds) 75c; 1/16 oz. (over 250 seeds) 50c; per pkt. of about 75 seeds, 25c.

**TUBERS.** Unwin's Hybrid Charm Dahlias. Delightful Mignon Dahlias; beautiful single and semi-double dwarf Dahlias; good keepers and charming for bouquets or house decoration. Six different varieties for \$1.50, prepaid; \$2.90 per doz. (all different) prepaid; each 30c.

All our Mignon Charm Dahlias make excellent cut flowers for house decoration, lasting for many days. In this they differ from the ordinary dahlias. Please bear in mind that the tubers from these Mignon or Charm dahlias are small, much smaller than the ordinary dahlias. Customers complain sometimes about the tubers being so small.

**Little Pink Lady.** A charming semi-double light pink Mignon Dahlia with fluted petals with yellow center. Height 1½ to 2 ft. **Three tubers for \$1.00; each 35c.**

**Carmencita.** A beautiful rich brilliant carmen; a profuse bloomer. Ht. 2 ft. **35c each.** The above two Mignon Dahlias were selected from out of dozens of different varieties, as the best colors and the prettiest flowers. Please note that the tubers of these dahlias are small, much smaller than the ordinary dahlias. Customers complain sometimes of tubers being so small.

**POMPON DAHLIAS.** Many people say they have no room for Dahlias, but the Pompons take up so little, and are a very valuable flower for the small garden, providing bloom when there is a dearth of such. We want to convert you to like, at least, this kind of Dahlia. We are sure you will be delighted with the darling Pompons. They ask so little and give so much. Little or no staking is required, there is constant bloom, and that splendid quality, long life as a cut flower. They are delightful little guests in the house.

**Amber Queen.** Golden amber and orange.

# Oh! Thank You

Oakland, Minnesota.

Seeds bought from you always bring joy, the plants are so far superior to others. My flowers are famous all over the country and Delphinium time is heaven indeed.

Every seed that I purchased in the first order this spring are lusty seedlings now, growing in pots in sunny windows. "Trollius Ledebouri" came 100%. "Isaac House's Scabiosa" was far beyond all hopes. "Double Pyrethrum" a solid mat of plants. Coaxing "fussy" seeds to grow into glorious blooming plants is life for me.

"Dobbie's Columbines" are the most exquisite things in that line I ever saw, but PRIZE WINNING DELPHINIUMS are the CLIMAX OF EVERYTHING. It was a poor Delphinium year here, dry hot days with the wind blowing incessantly, but the roots of those PRIZE WINNERS seemed to have gained strength on the drouth for they show promise of out-doing themselves this season.

MRS. F. L.

Dear Sir:

Tarkio, Missouri, July 26, 1938.

The white delphiniums I bought of you last fall caused such a sensation this spring when in bloom. I had one plant which produced white flowers with a black bee—also some glistening white double ones. I will order more seedlings for fall planting soon as I think they are much cheaper and more satisfactory in the end.

MRS. G. J. S.

Caldwell, Idaho, February 18, 1938.

Our dahlias were a dream of beauty—an absolute necessity in our garden now. My Dream delphinium seed are coming up splendidly.

MRS. F. B.

Dear Sir:

Patton, Penna., July 25, 1938.

The advanced seedlings that I received this spring came in perfect condition and have nearly all bloomed. I am more than delighted with them—they surely are gorgeous and have been admired by many, many people.

MRS. A. O. S.

Crestline, Ohio, July 13, 1938.

I have been growing Delphiniums from your pedigreed seed for the past five years and find it the best available. I am sure we have the best Delphiniums, both in the blues and whites in this locality if not in the whole state. My aim is to keep on improving my stock and feel sure I can do no better than with PUDOR'S SEEDS.

I. G. S.

Creston, Iowa, July 28, 1938.

I have the happiness and joy every day with my lovely delphiniums from Pudor's. I am now ordering more, as I know I am ordering from the right place.

MRS. J. H.

Dodge City, Kansas, June 28, 1939.

I have beautiful delphiniums, the most beautiful White Wonder. No one around here has them. Your seeds are the best I ever had.

MRS. C. R. K.

Dear Sirs:

Portland, Oregon, October 18, 1938.

Delphinium seed purchased from you a few years ago produced the finest collection of delphiniums I have ever seen.

Very truly yours, P. E. VAN A.

Kalamazoo, Michigan, August 19, 1938.

I purchased a packet each of Dream, White Wonder, and 55/66 last year which have produced the most beautiful bloom I ever saw. They are gorgeous, indeed, all of them.

MRS. W. J. K.

Racine, Wisconsin.

Have received the delphinium seeds from you in a shorter time than anticipated. Every one of them came up, and sure looks promising.

MRS. C. G.

The annuals and lupin seeds that I ordered this year are doing fine. I feel all your seeds are of a superior quality.

MRS. B. A. J.

Dear Sir:

Auburn, New York, August, 1939.

I had a ½ pkt. of your White Wonder last fall, and am very much pleased. It produced about 50 per cent with only two blue, the rest were pure white. Looked just like the picture in the catalogue, and were 3 inches in diameter. They had no special care, just sowed in a box in the fall and transplanted in the garden in the spring. I took a basket of them to the annual flower show and they won a blue ribbon.
